EDUCATION

DY. Patil University

Dec 2021 – June 2025

B.Tech - Computer Science and Engineering - CGPA - 8.4

Pune, India

Nehru Junior Science College

May 2019 – June 2021

Intermediate in Science - Percentage - 70%

Tumsar, India

EXPERIENCE

Innomatics Research Labs

Feb 2025 - Mar 2025

Full Stack Developer Intern

Pune, India

- Built a healthcare booking system using **MERN Stack**, handling **100+ concurrent user**.
- Implemented real-time **patient-doctor appointment scheduling** with form submissions via **Formspree**, **reducing booking time by 30%**.
- Developed **role-based access control (RBAC)** for Admins, Doctors, and Patients, achieving **100%** compliance with data privacy norms.
- Optimized backend APIs and enhanced UI performance, delivering a seamless booking experience.

Main Flow Services & Technologies Pvt.Ltd

July 2024 - Sep 2024

Web Designing Intern

Noida, India

- Designed and Developed a fully responsive e-commerce website using **HTML**, **CSS**, and **JavaScript**, improving accessibility and SEO.
- Built a **news aggregation platform** using **React.js** and **Bootstrap** with **live updates** for users.
- Optimized **web performance** and **loading speed** across devices.

PROJECTS

SmartRecruit Hiring Platform | [GitHub](#)

Feb 2025 - Mar 2025

- Built an **AI-powered recruitment platform** with **automated assessments** and **real-time interviews**.
- Integrated **face detection** with **5+ cheat prevention mechanisms** for secure evaluations.
- Developed a **video interviewing system** with streaming, chat and recruiter verification.
- Implemented **automated communication** with **instant emails** and **candidate tracking**.

StudyNotion Online Learning Platform | [GitHub](#)

Jan 2025 - Feb 2025

- Developed a scalable **EdTech platform** using **MERN stack**, enabling **1,000+ course enrollments** with **progress tracking**.
- Integrated **Razorpay** for secure online payments with **automated email** notifications.
- Built a **real-time instructor dashboard** with **data visualization**, reducing **course management time** by **30%**.
- Designed a **responsive UI** using **React.js**, **Redux**, and **Tailwind CSS**, boosting mobile accessibility by **40%**.

Gemini Clone | [GitHub](#)

Sep 2024 - Oct 2024

- Developed a Gemini clone using **MERN stack** with **TypeScript**, handling **500+ concurrent requests**.
- Integrated the **Google Gemini API**, enhancing application functionality by **40%**.
- Implemented **user authentication** with **Firebase**, securing **1,000+ user accounts**, and managed state using **Redux** in **React.js**.
- Built **RESTful APIs** in **Node.js** and **Express.js** to handle user and result data, using **MongoDB Atlas** for storage, improving data retrieval speed by **35%**.

CERTIFICATIONS

- Mastering MERN Full-Stack Development - Apna College
- NC-RISES 2024: 1st National Conference on Radical Innovation for Sustainable Engineering Solutions
